Evansville RC Club's

Open House

Saturday May 17th

10 AM til? PM

The Evansville RC Club is hosting an Open House for the public to come out and see our beautiful flying field. Watch pilots fly some amazing aircraft and even fly yourself. That's right. We have a buddy box system that allows you to fly an airplane in th sky. If/when you get in trouble, the instructor can instantly take over flying and get you back stright and level. We have 2 flying simulators that you can practice on the computer before you take to the air. Don't be shy. If you ever thought about learning to fly a remote control aircraft, then come on out to the field May 17th. Our members would love to talk to you about our Hobby!

See the Map to our field below.
